[AI Generator](#)

Node.js, Express.js, Html and Css

- This Web App was created through my two passions, Web Development and Machine Learning, using OpenAI API calls, this allows you to set your own parameters with no restrictions that ChatGPT puts in place.
- The technology behind this app was created using Express.js, a server side backend framework that integrates my own API to make the

[Blog/Portfolio Website](#)

Javascript, Html, Bootstrap

- Features engaging animations created using the Particles.js package.
- The site incorporates industry-standard Bootstrap styling to achieve a polished and professional design.
- This project effectively demonstrates an understanding of web development principles applied to real-world projects.
